

**SIGN UP FOR OUR G.H.P.P.M.
(GEOTHERMAL HEATPUMP PREVENTIVE MAINTENANCE)**

Our G.H.P.P.M.P. consists of verifying the operation of System

- Proper loop pressures & temperature differences
- Proper loop pump(s) amperage under operation
- Proper hot water assist pump amperage under operation
- Proper air temperature differential under different stages of operation
- Proper compressor amperage under staging
- Visual check for Freon leak and water leak
- Visual & Sound check for excessive vibration
- Check for dirty coil & filters
- Check thermostat operation and display
- Check Aux Heat for malfunction

Semi-Annual Check Up (10 Point Check) consists of 1 check up in the heating mode and 1 check up in the cooling mode. Cost for this is \$190.00 for one furnace + \$140.00 for each additional furnace annually. For the semi-annual check-up you will be billed \$100.00 for one furnace + \$75.00 for each additional furnace on your first check up. You will then be billed \$90.00 for one furnace + \$65.00 for each additional furnace upon your second check up. Payable at time of service. **(Price subject to change without notice.)**

Annual Check Up (10 Point Check) consists of 1 check up in either the heating mode or cooling mode. Cost for this is \$100.00 for one furnace + \$75.00 for each additional furnace. Payable at time of service. **(Price subject to change without notice.)**

Benefits of Preventive Maintenance

- Extend life of your system
- Peace of mind that your system works adequately
- Lower utility bills
- Possible prevention of a big failure, that could end up in expensive repair bills
- Priority Service over non-PMA customer
- Discounted parts 10% to 20% off list price
